Summary

Senior Full Stack Engineer with a background in Team Leadership and Cross Team Collaboration & Communication plus wide experience on both Front End and Back End being Angular, React, and NodeJS my favorite technologies

Work Experience

Catawiki | May 2022 - Amsterdam, Netherlands
Senior Full-Stack Engineer
Currently working on a high customer volume bidding application that requires constant communication and collaboration between multiple company streams, using technologies such as React with NextJS and Ruby on Rails on a Containerized Microservice & Microfrontend architecture and developing based on data by doing AB Testing.

Wind River | November 2020 - May 2022 - Costa Rica
Technical Leader - Senior Software Engineer
Developing, implementing, and maintaining high-standard applications by collaborating between multiple and international company teams, based on the business requirements of the Research and Development department, using technologies such as Angular, Node Js, Docker, Kafka, and Postgresql on a containerized architecture.

Costa Rica Virtual - Web Agency | October 2019 - February 2022 - Costa Rica
Freelance Web Application Developer
Designed, planned, developed, implemented, and released a travel agency client's core application front end on a new software built on Angular and Node js.

Gorilla Logic | May 2019 - November 2020 - Costa Rica
Web Application Developer
Develop, implement, and release a financial entity's core application front end on a new software built on Angular and .Net Core.

First Factory | Sep 2018 - May 2019 - Costa Rica
Ruby on Rails Developer
Develop, implement, and release mission-critical solutions for banking software built on the Ruby on Rails framework and React Js.

Intel Corporation | August 2017 - Sep 2018 - Costa Rica
Application Developer
Developing, implementing, and maintaining high-standard applications based on the business requirements also helps in the standardization of the development of the department.

National University of Costa Rica | August 2016 - June 2017 - Costa Rica
Web Development assistant
Helped in the development of internal web applications used inside the campus, such as inventory management and enterprise management systems.

Education

National University of Costa Rica | Feb 2013 - Dec 2018
Bachelor in Information systems engineering
